BAZOOKA™

- Water will continually drain through the filter, but in case of a spill within the berm, when an organic substance is detected, the Imbibor Bead® technology takes over (colour change), and the flow is completely shut off
- This automated shut off system allows water drainage of containment berm applications
- Utilises an innovative system for detection of Class I and II organics such as diesel fuel
- Trickle filter allows water flow rate of 20 gallons per hour
- Optional kit contains all you need for an easy field installation
- Compatible with all Enpac containment berms
